Experience

ServiceNow

April 2024 - Present

Product Manager, Unified Employee Experiences

Hyderabad, India

- Led **0 to 1 product strategy** for the **EmployeeWorks** AI-native portal from concept to **GA in 6 months**, owning discovery, PRDs, and backlog to orchestrate cross-departmental workflows (IT, HR, Finance) into a unified "front door" for **10 enterprise pilots** targeting **1M+ end users**, with early adopters including **CVS Health, City of Raleigh, and Siemens Healthineers**.
- Spearheaded the **Employee Center Pro** integration with **Moveworks**, growing the business **5x YoY** post-launch.
- Designed the **People Finder AI Agent** using **LLM Text-to-Cypher** query generation over **Knowledge Graphs** for end-to-end task execution, eliminating manual search friction across highly matrixed organizational structures.
- Established **GenAI model evaluation frameworks** (Gemini, Claude, GPT-4) across **100+ evals** with rigorous 3P testing to enforce a **90%+ release accuracy gate**, while spearheading **in-session token caching** to eliminate redundant LLM calls.
- Delivered omnichannel experiences across **Microsoft Teams, Outlook, and Now Mobile**, scaling to **500+ enterprise customers**; **CVS Health** made Teams its primary channel, driving **2.5M AI conversations**.
- Authored PRDs and user stories for the **Notification Engine**, owning backlog prioritization across 6 releases; partnered with platform engineering to scale to **250M+ monthly notifications** across **5,000+ deployments**.
- Drove GA adoption of **My Requests** (**200+ enterprise customers**) and **Service Feedback** (**800+ deployments**), unlocking activation-driven value: **94% service automation at Siemens, 50% ticket reduction at Stellantis**.
- Managed cross-functional delivery across **2 concurrent engineering scrum teams** and **5 product designers** (US-based), running sprint cadence across IST and US time zones, leveraging **Claude** for rapid HTML prototyping.
